The screenshot shows a web browser window with the address bar displaying 'localhost:8000/viewStudent'. The page has a dark header with 'Register' on the left and 'logout' on the right. Below the header is a table with columns: No, Name, Email, phone Number, Image, and update. The table contains two rows of student data. The first row has '0' in the 'No' column, 'Hiten Chotaliya' in 'Name', 'chotaliyahi@gmail.com' in 'Email', '8735893833' in 'phone Number', and a small image in the 'Image' column. The 'update' column for this row contains 'Edit' and 'Delete' buttons. The second row has '1' in the 'No' column, 'neel' in 'Name', 'n@gmail.com' in 'Email', '8745214585' in 'phone Number', and another small image in the 'Image' column. The 'update' column for this row also contains 'Edit' and 'Delete' buttons.

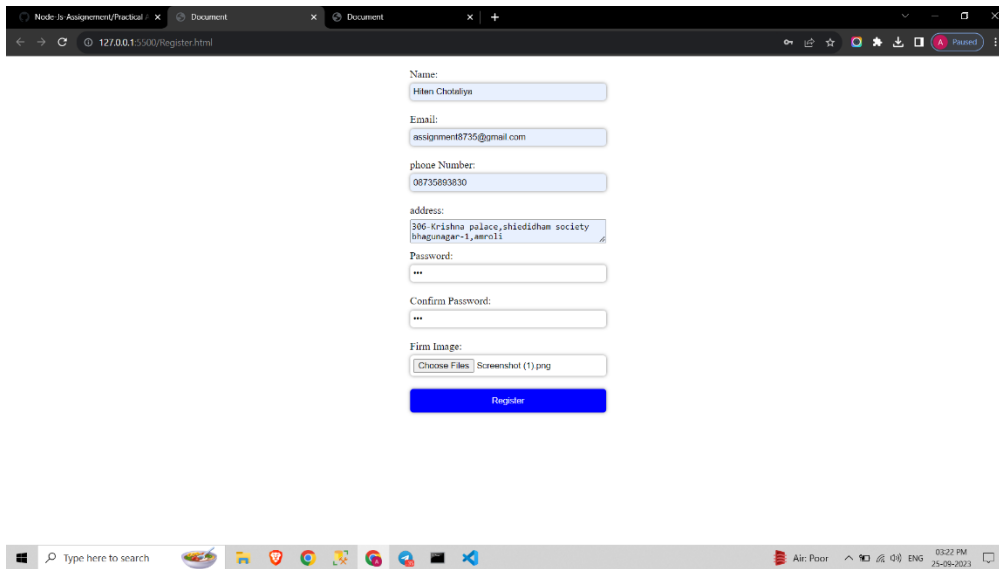

No	Name	Email	phone Number	Image	update
0	Hiten Chotaliya	chotaliyahi@gmail.com	8735893833		Edit Delete
1	neel	n@gmail.com	8745214585		Edit Delete

This screenshot is identical to the one above, showing the same web application interface with the student list table. The 'Delete' button is highlighted in the 'update' column for the first student entry.

No	Name	Email	phone Number	Image	update
0	Hiten Chotaliya	chotaliyahi@gmail.com	8735893833		Edit Delete
1	neel	n@gmail.com	8745214585		Edit Delete

Question5:Login with JWT, CRUD operations for students table with mongoose, express and frontend(html,css,javascript/jquery/angularjs), Logout.
